ABOUT ME

I am an aspiring System Analyst with a passion for understanding business processes, identifying operational challenges, and designing efficient, user-centered digital solutions. I enjoy bridging the gap between user needs and technical development through research, problem-solving, and system planning. My goal is to create innovative solutions that improve workflows and enhance user experiences

EXPERIENCE

Game Jam 2025 (**University of the Philippines**)

Project Manager

Lead the Duo.exe team in creation of Jeepney Jam. The game won as People's choice award and was recognized by the school's ITS organization.

Web Development (**2025**)

Project Manager & Fullstack

Developed a web-based application named "EaterList" for web development project. Fully take on the role of fullstack development and project manager until succession of the project.
